Extra for your cranes

Keep your cranes exceptional in a cost-effective way

Amsak Cranes offers speedy and practical approaches to keep your cranes exceptional. Be it retrofitting VFD drives or radio far off controls, ask Amsak Cranes how to best rearrange modernisation of existing cranes with the most recent innovation.

Improve administration life

An intensive specialized appraisal by Amsak Cranes specialists takes into consideration the precise identification of the measures to be taken to improve the administration life of the crane. Updating includes total renovation or supplant ment of electrical parts, drives and other basic parts. Amsak Cranes certifies your restored cranes for use.

Bring back your cranes to new condition every time

Amsak Cranes is prepared to complete a wide range of electrical, mechanical or basic fixes of any make of cranes. Our workshop can deal with such an occupation which requires a huge space and devours time for auxiliary fixes. This is completed by a group of specialists at planning and producing cranes. Specialized backing by the main crane maker, ElectroMech gives us knowledge into the prescribed procedures to bring back your cranes to OEM (or better) specifications.

Improve limit as your business grows

As your business grows, the current foundation may be overhauled and hardware supplanted. At Amsak Cranes, we assist you with accomplishing this while holding your financial plan under wraps. We assess your current cranes for the likelihood to increment their ability with designing intercessions. We go past not just upgrading the limit of your cranes, yet in addition dispensing and moving them to best suit the workflow or improve the plant capacity. just upgrading the limit of your cranes, yet in addition dispensing and moving them to best suit the workflow or improve the plant capacity.

Training

Our duty to keeping your cranes gainful doesn't end with adjusting them. Legitimate training of the crane operator who is the extreme user of the crane goes far in guaranteeing its safe and reliable operation. Our exceptionally planned preparing programs empower operators to utilize your cranes, guarantee safe activities, and perform occasional sound and visual checks to identify areas that require attention. Beyond training your end users, Amsak Cranes can help you with performance planning, development of crane KPIs and performance reporting.

Rope Conditioning

A wire rope ordinarily debilitates with abuse and can represent a danger of a mishap. Amsak Cranes has built up a creative technique to check wire rope for its solidarity, rotational strength, flexibility, primary capacity furthermore, spooling conduct. Our master group checks the wire rope through Rope Conditioning and proposes restorative activities for strength, flexibility and resistance to abrasion, crushing, fatigue, rotation and corrosion.

Rail Monitoring

For protected and smooth activity of your cranes, amazing levels, track straightness and parallelism of the tracks are critical. Amsak Cranes offers a particular and innovatively progressed crane rail observing framework for smooth crane establishments.

Benefits

Occasional rail checking keeps away from circumstances like:

-  **Untimely wear and tear of haggles**
-  **Unpredicted crane personal time**
-  **Cost-driven fixes or substitutions**

Amsak Cranes offers a total answer for both, the rail systems, utilizing Rail Monitoring just as the adjustment required.

Erection & Commissioning

Amsak Cranes supplements the planning and assembling experience of ElectroMech with flawless erection and authorizing ability. Our huge group of specialists and experts have the experience to introduce cranes in difficult landscapes and climatic conditions. With such experience, they can survive site difficulties to guarantee time-bound fulfillment.

Modification & Relocation

Designing mediations can improve the life of the gear and make it reasonable for reuse in another task. Amsak Cranes completes such modification and movement extends that spare our clients extra capex,time and endeavors in obtaining new gear.

Normal modification ventures include:

- ✓ Improving the SWL of existing cranes
- ✓ Modifying crane length (expanding or diminishing)
- ✓ Modification for flexible tallness
- ✓ After such modifications, the crane can be reused for another task, at an alternate area while limiting venture

Products for Safety and Ease of Handling

Amsak Cranes has a variety of items and administrations that help guarantee protected, smooth and bother free tasks of your cranes. These items can be effectively fitted to your current cranes to encounter numerous new progressed highlights. They permit the administrator to dominate unlimited oversight of the gear and improve its presentation.

Sway Control

The Sway Control forestalls the swinging of the heap and guarantees that it stays stable while lifting and crossing. This forestalls any peril to resources, individuals and the heap itself while lessening time spent in balancing out the heap. The Sway Control from Amsak Cranes is an unquestionable requirement for your cranes to work ideally and securely.

Anchoring System for Outdoor Gantry Cranes

Outside cranes frequently need to confront nature's rage, for example, substantial breezes and tempests. A solid securing framework holds the whole crane structure at the place of work, in this way keeping the crane from bringing down and evading major mishaps and death toll and property.

Anti-collision Device and Human Sensors

In a few production lines, various cranes are utilized in a similar straight what's more, are worked at the same time. This represents a peril of two cranes crashing because of a blunder of judgment of the administrator. To dodge such acircumstance, Amsak Cranes offers the Anti-impact Gadget. It utilizes nearness sensors that excursion off the switches if the protected distance limit is crossed. This naturally guarantees that a protected distance is constantly kept up between two cranes.

Radio Remote Control for Added Flexibility

Typically, cranes are furnished with a fixed pendant control that represents a restriction while working them. Amsak Cranes offers added flexibility in activity by appropriately fusing RRC, Lodge and Human Machine Interface (HMI). Radio Remote Control permits the operator to effortlessly work the crane from a distance. It decreases operator's weariness, upgrades efficiency also, guarantees quick control on crane activities. Our RRCs stick to different European wellbeing guidelines, guaranteeing high levels of wellbeing, and fuse progressed highlights.

Maintenance Annual Maintenance Contracts
